This document is subject to change without notice.

## Document History

Date	Author	Description	Version
04/22/10	DD, KG, LD	Removed Embedded Modules, 1454 and 1455 DESFire Credentials and updated FIPS-201 Wiegand Output Mode for iCLASS, multiCLASS, Read/Write, and HADP/OSDP readers	D.0
01/20/10	DD, KG	Modified Rijkspas PNs, Added iCLASS FIPS ordering options, Fixed iCLASS LCD FIPS ordering option, modified link to SmartID Generic configuration guide. Changed 200/210 iCLASS Card Slot Punch options.	C.9
11/25/09	M. Butler	Added iCLASS/multiCLASS Rijkspas Reader	C.7

### Overview

Welcome to 13.56 MHz by HID. HID Global offers a variety of reader families that are compatible with most 13.56 MHz technologies existing in the market today. HID's primary 13.56 MHz product lines include iCLASS<sup>®</sup> and SmartID<sup>®</sup>.

iCLASS is the first advanced contactless smart card technology designed by and for the access control professional. iCLASS readers and cards offer your customer the highest quality card and reader system. The access control system is designed to both pass card data to an access control host, and perform read/write functionality in card non-access control areas.

SmartID is a highly customizable ISO14443 (MIFARE<sup>®</sup> / DESFire<sup>®</sup>) reader platform enabling the dynamic application fit new and existing populations of custom defined card data structures. Customize authentication keys, communication encryption, data location and length, data output and much more.

Making it easy for you to offer your customers exciting new products with enhanced benefits, HID has prepared this 13.56 MHz How to Order Guide.

This How to Order Guide provides information for:

- 13.56 MHz reader and module products
- 13.56 MHz credentials

#### iCLASS Reader Identifiers

The alpha designator within the product model indicates whether the reader is:

- READ ONLY (R)
- READ/WRITE (RW)
- READ ONLY/PROXIMITY (RP)
- READ ONLY WITH KEYPAD (RK)
- READ ONLY WITH KEYPAD/PROXIMITY (RPK)
- READ/WRITE WITH KEYPAD (RWK)
- READ ONLY WITH KEYPAD/LCD (RKL)
- READ/WRITE WITH KEYPAD/LCD (RWKL)
- READ ONLY WITH KEYPAD/LCD/BIOMETRICS (RKLB)
- READ/WRITE WITH KEYPAD/LCD/BIOMETRICS (RWKLB)
- READ ONLY WITH MAGNETIC (RM)
- READ ONLY WITH MAGNETIC/PROX (RMP)
- READ ONLY WITH MAGNETIC/KEYPAD (RMK)
- READ ONLY WITH MAGNETIC/PROX/KEYPAD (RMPK)

#### SmartID Reader Identifiers

The alpha designator indicates whether the reader is:

- READ ONLY (S)
- READ ONLY/PROXIMITY (SP)
- READ ONLY WITH KEYPAD (SK)
- READ ONLY WITH KEYPAD/PROXIMITY (SPK)

The following numeric designator signifies the physical size of the unit. (The smaller the number, the physically smaller the unit.)

## 13.56 MHz Reader

### iCLASS Read Only Readers

When your application requires the ability to read card numbers and output data using the standard Wiegand or Clock and Data protocols, use a **read only (R series)** iCLASS product.

**R10** - Physically the smallest reader, the R10 is ideal for **mullion mounted** door installations. The R10 will read HID card formats from iCLASS cards, or the card serial number (CSN) from a MIFARE card, and delivers the information to an existing access control panel using industry standard Wiegand protocol.

**R15** - The R15 is ideal for **mullion mounted** door installations. The R15 will read HID card formats from iCLASS cards, or the card serial number (CSN) from a MIFARE card. Delivering the information to an existing access control panel, the R15 uses industry standard Wiegand protocol.

**R30** - This 8.5 cm (3.3") square reader is designed to mount to and cover standard **EU and APAC back boxes**. This reader has the same read only abilities as the R10 with the added features of a longer read range and built-in tamper magnet.

**R40** - The R40 is designed to mount and cover **single gang switch boxes** primarily used in the United States and includes a slotted mounting plate for European and Asian back box spacing. It contains all the features of the R30 and offers longer read range.

### iCLASS Keypad Readers

**RK40** - This reader is the same size and shape as the R40. The 12-position weatherproof keypad features vandal-resistant metal keycaps and backlit numbering. The RK40 supports dual authentication of identity by combining card presentation and entry of a PIN. The PIN can be verified either at the access control panel or locally by the keypad reader. When verified locally, the PIN must be programmed into the iCLASS Card.

**RKL55 / RWKL550** - This LCD/Keypad reader allows for dual-factor authentication in addition to user messages displayed on an LCD screen. The reader is designed to fit on a **single gang switch box** for US, EU or APAC usage. The reader is available in read only or read/write configuration.

### iCLASS Multi-Technology Readers (multiCLASS®)

**RP15** - The RP15 reader simultaneously supports HID and AWID or Indala proximity, iCLASS, MIFARE (CSN), and HID multi-technology credentials. The RP15 is ideal for **mullion mounted** door installations.

**RP40** - The RP40 reader simultaneously supports HID and AWID or Indala proximity, iCLASS, MIFARE (CSN), and HID multi-technology credentials. The RP40's mounting plate attaches to **US, EU or APAC back boxes** with 52-60 mm screw hole spacing (vertical or horizontal), or to any flat surface. The reader body snaps onto the mounting plate and the cover snaps over the reader body, and then secured with a screw.

**RPK40** - The RPK40 simultaneously supports HID and AWID or Indala proximity, iCLASS, MIFARE (CSN), and HID multi-technology credentials. Additionally, the RPK40 supports dual factor authentication of identity by combining card presentation and PIN entry. Either verify the PIN at the access control panel or locally by the keypad reader. When verified locally, program the PIN into the iCLASS Card. The RPK40's mounting plate attaches to **US, EU or APAC back boxes** with 52-60 mm screw hole spacing (vertical or horizontal), or to any flat surface. The reader body snaps onto the mounting plate and the cover snaps over the reader body, and then secured with a screw.

### iCLASS Multi-Technology Readers with Magnetic Swipe Reader (multiCLASS)

All magnetic swipe multiCLASS readers consist of two-pieces including cover/electronics and mounting plate. The mounting plate has a built-in vertical swipe magnetic reader. Mount the magnetic swipe to the reader left or right. Mounting plate attaches to U.S. back box, 52-60 mm screw hole spacing (vertical or horizontal), or to any flat surface. Reader cover/electronics is secured to the mounting plate with a security screw. After the magnetic card migration has completed, increase security by replacing the built-in vertical swipe magnetic reader mounting plate with a standard mounting plate.

## 13.56 MHz How to Order Guide – D00529, D.0

**RMK40** – The RMK40 simultaneously supports magnetic stripe, iCLASS, and HID multi-technology credentials. Additionally, the RMK40 supports dual factor authentication of identity by combining card presentation and PIN entry. Either verify the PIN at the access control panel or locally by the keypad reader using specially enrolled iCLASS credentials.

**RMPK40** – The RMPK40 simultaneously supports magnetic stripe, Genuine HID Prox, AWID Prox, iCLASS, and HID multi-technology credentials. Additionally, the RMPK40 supports dual factor authentication of identity by combining card presentation and PIN entry. Either verify the PIN at the access control panel or locally by the keypad reader using specially enrolled iCLASS credentials.

### iCLASS Biometric Readers (bioCLASS™)

**RLB57 / RWKLB575** – This biometric LCD/Keypad reader allows for three-factor authentication using biometric finger authentication, keypad and card. User messages are displayed on an LCD screen. The reader is designed to fit on a **single gang switch box** for US, EU or APAC usage. The reader is available in read only or read/write configuration.

### iCLASS Long Range Readers

**R90** - The R90 is the largest size (12" or 30.5 cm square) and longest read range iCLASS contactless smart card reader in the iCLASS product line. The R90 will read HID card formats from iCLASS cards, delivering the information to an access control panel using industry standard Wiegand protocol.

### iCLASS Reader/Writers

When your application requires the ability to read and write data to the card, use a read/write (RW series) iCLASS product. The four standard iCLASS reader/writers are:

**RW100** - Physically the smallest reader/writer, the RW100 is ideal for **mullion mounted** door installations. The RW100 contains all the features of the R10, with the added features of read/write capability via RS232, RS485, UART or USB.

**RW300** - This 80 mm (3.15") square reader is designed to mount to and cover standard **EU and APAC back boxes**. The RW300 contains all the features of the R30, with the added features of read/write capability via RS232, RS485, UART or USB.

**RW400** - The RW400 is designed to mount to and cover **single gang switch boxes** primarily used in the US. The RW400 contains all the features of the R40, with the added features of read/write capability via RS232, RS485, UART or USB.

**RWK400** - This reader/writer offers the same features as the RK40, with the extended ability to read/write user data to iCLASS credentials via RS-232, RS485, UART or USB.

### iCLASS Programmer

The iCLASS CP400 & CP575A Card Programmers are designed for on-site programming of access control data, PIN codes, and user data onto HID iCLASS cards. The Card Programmer allows HID proximity formats, keypad PIN codes, and user data fields to be programmed directly into iCLASS contactless cards. The CP400 Card Programmer includes a desktop reader/writer, personalization diskette, universal power supply, and serial cable. The CP575A Card Programmer includes CP400 features with the added capability of programming biometric templates for use in the bioCLASS reader and includes a bioCLASS reader/writer, personalization diskette, universal power supply and USB cable. Ensuring security of the format and cards, required is an iCLASS Card Programmer license.

### SmartID Readers

**S10** – The S10 is ideal for **mullion mounted** door installations. Reading MIFARE (sector) or DESFire (application/file), card data, the S10 delivers the card data to an access control system using industry standard protocols, including Wiegand. Mount the reader on a **single gang switch box** for US, EU or APAC usage by ordering an additional mounting accessory.

**SmartID Keypad Readers**

**SK10** - The SK10 is ideal for **mullion mounted** door installations. The SK10 offers dual-factor authentication using keypad and card. Reading MIFARE (sector) or DESFire (application/file) card data, the SK10 delivers the card data to an access control system using industry standard protocols, including Wiegand. The reader can be mounted on a **single gang switch box** for US, EU or APAC usage by ordering an additional mounting accessory.

**SmartID Multi-Technology Readers (SmartTRANS)**

**SP10** - The SP10 is ideal for **mullion mounted** door installations. The SP10 reads either 125 kHz HID Prox and AWID card formats in addition to MIFARE (sector) or DESFire (application/file) card data. The SP10 delivers the card data to an access control system using industry standard protocols, including Wiegand. Mount the SP10 on a **single gang switch box** for US, EU or APAC usage by ordering an additional mounting accessory.

**SPK10** - The SPK10 is ideal for **mullion mounted** door installations. The SPK10 offers dual-factor authentication using keypad and card. The SPK10 reads either 125 kHz HID Prox and AWID card formats in addition to MIFARE (sector) or DESFire (application/file) card data. The reader will deliver the card data to an access control system using industry standard protocols including Wiegand. Mount the reader on a **single gang switch box** for US, EU or APAC usage by ordering an additional mounting accessory.

**SmartID Biometric Readers (SmartTOUCH)**

**SB10 / SBK10** – This biometric reader comes with or without keypad and offers three-factor authentication using biometric finger authentication, keypad and card. The reader is designed for a **mullion mount**, but mount the biometric reader on a **single gang switch box** for US, EU or APAC usage by ordering an additional mounting accessory.

**SmartID Reader/Writers**

**SW100** – The SW100 is ideal for **mullion mounted** door installations. Read/Write application supports T=CL (or legacy 3964) bi-directional serial protocol implemented over RS232, RS485 or RS422 physical link. Enables read/write to MIFARE and ISO14443-4 credentials (DESFire, SmartMX).

**SWK100** – The SWK100 is ideal for **mullion mounted** door installations. Read/Write application supports T=CL (or legacy 3964) bi-directional serial protocol implemented over RS232, RS485 or RS422 physical link. Enables read/write to MIFARE and ISO14443-4 credentials (DESFire, SmartMX).

**SWD100** – Desktop reader/writer connects to a computer through a USB or RS232. The hosts send commands to SWD100 in order to read/write data to MIFARE, DESFire and any other ISO14443-4 card through T=CL (RS232) or PC/SC (USB Only) protocols.

**SmartID Programmer (SmartTOOLS)**

SmartTOOLS is a card programming software suite providing custom access cards and configuration card programming of MIFARE cards.

ProxBurn is an access card programming component of SmartTOOLS. ProxBurn programs custom MIFARE cards for use on SmartID access control readers. The ProxBurn package includes a CD with software application and manuals, RS232 cable and SWD100 with RS232 interface.

ReaderTOOLS is a configuration card programming component of SmartTOOLS. ReaderTOOLS creates configuration cards configuring SmartID readers to perform custom access control applications against existing and new card populations with custom requirements. The ReaderTOOLS package includes a CD with software application and manuals, USB cable and SWD100 with USB interface.

## iCLASS Credentials

HID offers a full line of iCLASS credentials. When choosing a credential, there are several important decision points:

1. Which form factor (i.e., card, key or tag) of credential best meets my needs?
2. Do I have a heavy duty card application or will I be laminating a patch to the card, which will require a composite card for best results?
3. Do I need a multi-technology credential (i.e., iCLASS and proximity or iCLASS and Wiegand) to help leverage investments in existing access control systems while transitioning to new technologies or applications?
4. How much memory do I need (i.e. 2k bits, 16k bits or 32k bits)?
5. How many application areas (2 or up to 16) do I need?

To help simplify the purchase of iCLASS credentials, all credentials are delivered pre-personalized with the default memory allocation and protection for the access control application. Within the part number, the numeric model number defines the technology, number of application areas and memory size.

All credentials come in two memory sizes, 2k bits (256 Bytes) with two application areas or 16k bits (2k Bytes) with two or sixteen application areas or 32k bits (4k Bytes) in two separate books. Application Area 1 is reserved by HID for access control use. The remaining application areas can be defined. Please review HID Application Note # 28 for more information about memory size and application areas.

Credentials are available in several form factors. You may request the correct memory size and/or application area configuration on any form factor. The form factor is not limiting. Offered form factors include:

**iCLASS Clamshell cards** – iCLASS Clamshell cards offer single-coil, read/write 13.56 MHz contactless smart card technology in a value-priced and highly-durable, molded ABS shell with customizable PVC label. The card is available in the 2K bit (256 byte) memory size only.

**iCLASS Cards** – Standard, 13.56 MHz single-coil, iCLASS cards will be manufactured to meet ISO standard dimensions. Personalize these cards by adding a photo ID, or barcode (These cards are also available with an optional magnetic stripe). For the iCLASS embeddable card, see the [Logical Access How to Order Guide](#).

**iCLASS Prox Cards** – iCLASS Prox cards offer a dual technology solution (13.56 MHz contactless smart card technology and 125 kHz proximity technology) in a single card. Personalize these cards by adding a photo ID, or barcode (These cards are also available with an optional magnetic stripe). For the iCLASS Prox embeddable card, see the [Logical Access How to Order Guide](#).

**iCLASS Wiegand Cards** – iCLASS Wiegand cards offer a dual technology solution (13.56 MHz contactless smart card technology and Wiegand strip technology) in a single card. Personalize these cards by adding a photo ID, or barcode (These cards are also available with an optional magnetic stripe).

**iCLASS Keys** – This newly designed hexagonal key is less obtrusive than a card in your pocket or handbag and has all the capabilities of a card or tag. The iCLASS Key was designed to fit on your existing key ring or used with a standard badge-clip.

**iCLASS Tags** – An adhesive tag can be placed onto an existing credential to allow for an easy transition from legacy technologies to iCLASS. The tag can also be placed onto any non-metallic object. However, HID recommends that every application be tested before purchase to ensure compatibility.

**iCLASS by HID.** A new solution for the access control market that is Smart, Powerful and Trusted. Become acquainted with this technology. You will understand the difference you can make in your customers' ability to secure and manage their environments by offering iCLASS !

## Basics of Ordering iCLASS Contactless Smart Credentials

Each part number consists of a base number, to indicate the type of credential, and a number or letter to indicate each credential option. Each credential has a standard part number which includes default options, as indicated on the attached credential guides. When an order is placed for a credential, the base number and all options must be specified. If you require any options that are different from the default options, you must also indicate those options at the time the order is placed. All part numbers must be complete to be accepted by HID's order entry system.

All reader orders must have the following information:

- **BASE MODEL NUMBER**
- **STYLE**
- **READ RANGE**
- **TYPE**
- **COLOR**
- **OUTPUT FORMAT** (*reader's format or format number must also be given at time of order*)

All credential orders must have the following information:

- **Base Part Number** - Indicates type of credential
  - Standard PVC
  - Composite 40% Polyester/PVC (Recommended for long life applications or when applying an over-laminate)
- **Memory Size and Allocation** -
  - 0 - 2k Bits (256 Bytes) with 2 Application Areas
  - 1 - 16k Bits (2k Bytes) with 2 Application Areas
  - 2 - 16k Bits (2k Bytes) with 16 Application Areas
  - 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
  - 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1
- **Programming** - Indicates whether the credential is programmed at the factory by HID or programmed by you with an HID iCLASS card programmer. If the credential is ordered non-programmed, an HID iCLASS card programmer must be used for programming. (Contact an HID sales representative for iCLASS card programmer eligibility).
- **Front Packaging** - Indicates standard or custom artwork and type of finish.
- **Back Packaging** - Indicates standard or custom artwork and type of finish.
- **iCLASS Credential Numbering** - Internal 13.56 MHz programmed number and visible external credential number.
- **Slot Punch**
- **Optional 125 kHz Proximity or Wiegand Credential Numbering** - Internal 125 kHz Proximity or Wiegand programmed number and visible external credential number.

All orders for custom artwork credentials must have the following information:

- **Custom Artwork Number** (Call your Customer Service Representative if number is not available)

In addition, all credential orders must have the following programming information:

- **Bit Format(s)**
- **Facility Code(s)**
- **Internal and External Start Numbers**
- **Internal PIN Code (Length: 2 – 12 Digits)**
- **Any Special Instructions**

### 13.56 MHz How to Order Guide – D00529, D.0

## Credentials 200/210 - iCLASS Card Ordering Guide

The iCLASS contactless smart card offers read/write capability. Personalize the card with a photo ID, magnetic stripe, barcode, or anti-counterfeiting element.

Please ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

**Base Model**     **200 Standard PVC**     **210 Composite 40% Polyester / PVC\***

#### iCLASS Memory Size and Allocation (Check One)

- 0 - 2k Bits (256 Bytes) with 2 Application Areas
- 1 - 16k Bits (2k Bytes) with 2 Application Areas
- 2 - 16k Bits (2k Bytes) with 16 Application Areas
- 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1
- 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1

#### Programming (Check One)

- C - Configured, Non-Programmed iCLASS. Programming Information Not Required.
- P - Programmed iCLASS. Specify Programming Information.

#### Front Packaging (Check One)

- G - Plain White with Gloss Finish
- C - Custom Artwork with Gloss Finish – Specify Custom Artwork Number<sup>1</sup>

#### Back Packaging (Check One)

- G - Plain White with Gloss Finish<sup>2</sup>
- C - Custom Artwork with Gloss Finish – Specify Custom Artwork Number<sup>1</sup>
- 1 - Plain White with Gloss Finish with Magnetic Stripe<sup>2</sup>
- 3 - Custom Artwork with Gloss Finish with Magnetic Stripe - Specify Custom Artwork Number<sup>1</sup>

#### Card Numbering<sup>3</sup> (Check One)

- M - Sequential Matching Internal/External (Inkjetted)
- N - No External Card Numbering
- S - Sequential Internal/Sequential Non-Matching External (Inkjetted)
- R - Random Internal/Non-Matching Sequential External (Inkjetted)
- A - Sequential Matching Internal/External (Laser Engraved)<sup>4</sup>
- B - Sequential Internal/Sequential Non-Matching External (Laser Engraved)<sup>4</sup>
- C - Random Internal/Non-Matching Sequential External (Laser Engraved)<sup>4</sup>

#### Slot Punch<sup>5</sup> (Check One)

- N - No Slot Punch (Printed location of vertical slot punch will remain)
- V - Vertical Slot Punch
- B - No Slot Punch - Horizontal Punch compatible (Printed location of Vertical and Horizontal slot punch will remain).<sup>6</sup>
- H - Horizontal Slot Punch<sup>6</sup>

12345 = Card ID Number  
YYYYYYYY-YY = Sales Order Number

#### Option - Custom Artwork<sup>1</sup>

- \_\_\_\_\_ (Specify Artwork Number – Refer to the Custom Artwork Forms for new artwork)

Please enter your final card options from check boxes above. Example: 2001CGGNN

Final Part Number										-	(Options #)
-------------------	--	--	--	--	--	--	--	--	--	---	-------------

### iCLASS Card Programming Information

Bit Numbers \_\_\_\_\_ (example: 26 bit)      Format Number \_\_\_\_\_ (example: H10301)

Facility Code \_\_\_\_\_

(Custom Formats) Site Code \_\_\_\_\_ City Code \_\_\_\_\_ OEM Code \_\_\_\_\_

Internal Card # Start \_\_\_\_\_ Stop \_\_\_\_\_ External Card # Start \_\_\_\_\_ Stop \_\_\_\_\_

PIN (2-12 digits) :  Sequential: Start # \_\_\_\_\_  Random: Length \_\_\_\_\_

Special Instructions: \_\_\_\_\_

<sup>1</sup> For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost. <sup>2</sup> Cards ordered with plain white front and back packaging, or custom artwork, will still have a small "HID logo" and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card. <sup>3</sup> The external card number is placed in the bottom right-hand corner on the back of the card. <sup>4</sup> For Laser Engraved external numbers, consult factory for lead times and cost. <sup>5</sup> Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards. <sup>6</sup> The ability to add a horizontal slot punch requires a different iCLASS antenna design. Users can expect a read range reduction of approximately 20% if they order options B or H for the Slot Punch. \* The composite construction is recommended for all cards with over-laminate applied. Please consult with the printer manufacturer prior to ordering.

### 13.56 MHz How to Order Guide – D00529, D.0

## 205 - iCLASS Key Ordering Guide

The iCLASS contactless smart Key offers read/write capability. Attach to a key ring or badge clip for convenient use.  
Please ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

### 13.56 MHz How to Order Guide – D00529, D.0

## 206 - iCLASS Tag Ordering Guide

The iCLASS contactless smart Tag offers read/write capability. iCLASS enable existing credentials or non-metallic devices such as cell phones or PDAs by adhering the iCLASS Tag.

Please ensure each required option has been checked with the appropriate choice to fulfill a completed order form.

### 206 Base Model Part Number Worksheet

#### iCLASS Memory Size and Allocation (Check One)

- |  |   |
|--|---|
| <input type="checkbox"/> 0 - 2k Bits (256 Bytes) with 2 Application Areas  | <input type="checkbox"/> 3 - 32k Bits (4K Bytes) Application areas 16k/2+16k/1  |
| <input type="checkbox"/> 1 - 16k Bits (2k Bytes) with 2 Application Areas  | <input type="checkbox"/> 4 - 32k Bits (4K Bytes) Application areas 16k/16+16k/1 |
| <input type="checkbox"/> 2 - 16k Bits (2k Bytes) with 16 Application Areas |   |

Internal Card # Start \_\_\_\_\_ Stop \_\_\_\_\_ External Card # Start \_\_\_\_\_ Stop \_\_\_\_\_

PIN:  Sequential: Start # \_\_\_\_\_  Random: Length \_\_\_\_\_

Special Instructions: \_\_\_\_\_

<sup>1</sup> The external tag number is placed on the back of the tag. <sup>2</sup> For new artwork files, contact Customer Service for custom artwork number, lead-times, minimum order quantities, and cost. <sup>3</sup> The iCLASS Tag is not for use on cards that use full insertion or tractor feed type readers.

Do not adhere to metal surfaces. Metal shields the RF, making the tag inoperable. Due to variations in cards and reading devices, HID does not claim that the iCLASS Tag will work in every situation. Functional and non-functional iCLASS Tags are available for compatibility testing with existing credential and reader technologies. Compatibility should be confirmed prior to ordering.

 **Back Side Colors:** \_\_\_\_\_

Do you plan to print over or around the custom artwork with a dye sublimation printer?  Yes  No

"Surface"  or "Laminated"  **Lithographic Printing** (Refer to the "Anti-Counterfeiting Descriptions" page in this guide for details)

**Card Options:**

- Slot Punch** <sup>2,5</sup>:  Yes  No  Horizontal  Vertical  
**Signature Panel:**  Yes  No Size: \_\_\_\_\_  
**Front Card Finish:**  Gloss  
**Back Card Finish:**  Gloss  
**Magnetic Stripe Coercivity:**  HID Standard (4000 OE)  (2750 OE)  
**Magnetic Stripe Type:**  Standard 3 Track  Debitek 1/8"  Other: \_\_\_\_\_

**Anti-Counterfeiting Options:**

- Invisible Ink:**  Red  Yellow  Blue  Green  Glow in the Dark  
**Micro-fine Print:**  Yes  No  
**Hologram** <sup>7</sup>:  Surface

**Notes:**

- Standard Composite Card is 25% Polyester and 75% PVC. A .035" thick card with 35% Polyester is also available. Contact Customer Service for details.
- Some cards will have printed "indicators" on the back of the card to show the vertical slot punch location.
- Some cards will have a small "HID logo" and reference number, custom artwork file number, and external number (optional) printed on the card.
- Do not order slot punched cards for use in dye sublimation printers. Slot edge may damage the printer ribbon. Slot should be punched after dye sublimation printing.
- Some video imaging printers cannot accommodate pre-slot punched cards. Please consult with the printer manufacturer prior to ordering
- Surface Holograms cannot be placed over internal electronics.
- Representation, Warranty and Indemnity.** Customer represents and warrants to HID that it owns, controls, or otherwise has the full and unrestricted right to use the custom artwork provided to HID for use in connection with this Custom Artwork Checklist Form (the "Custom Artwork") and to authorize and license HID to use and apply the Custom Artwork to the cards in the manner provided in this Custom Artwork Checklist Form. Customer agrees to indemnify HID and hold it harmless from and against any claims, liabilities, losses and/or expenses (including reasonable attorney fees and costs of suit) arising out of the use by HID of the Custom Artwork in the manner provided by this Custom Artwork Checklist Form or by any custom artwork proofs approved by the Customer."
- HID does not recommend placing custom graphics on either side of the Contact Smart Chip area.

Name: \_\_\_\_\_ Signature: \_\_\_\_\_ Date: \_\_\_\_\_

## Electronic Artwork Checklist

### File Submission & Preparation

This document gives digital artwork specifications from our press department. Use these guidelines and your project should go smoothly through the pre-press department.

**MEDIA:**

Please submit files via E-Mail or on CD. Compressed files should be self extracting. Submitted media will not be returned to the customer. FTP site available upon request.

**PLATFORM:** MS WINDOWS®/Macintosh®

Projects that are set up in any of the major applications (listed below under "Graphic Applications") generally translate to Macintosh® smoothly. **Please save your final file with pictures embedded, outlined fonts and EPS Vector editable file.**

**FONTS:**

Use Type 1 fonts and include screen and printer fonts on disk. Type may be converted to paths or outlines, but we cannot make copy changes to text submitted in this form. In addition, converted type loses the benefits of PostScript font definitions; hence, type quality may suffer. This is more noticeable in small type (-18 point).

**PLACED GRAPHICS:**

All placed graphics, saved as TIFF or EPS, should be included in their native program. If a Photoshop image is placed in a Quark document, we need the Photoshop image to produce the job. Sizing, cropping, rotation, etc. should all be done to the element in its native program and placed in Quark. Color images should be converted from RGB to CMYK. Special colors should be designated using PMS or provide color sample to be matched. Resolution of color images, B&W halftones, or duotones should be 300 dpi.

**GRAPHIC APPLICATIONS (latest version):**

Adobe Photoshop® - Adobe Illustrator® - QuarkXpress®

**BITMAPS AND TRACING:**

Scanned line art converted to bitmaps should have a resolution of 1200 - 2400 dpi. Lower resolutions will result in jagged curves. Many programs can convert (trace) bitmaps to vector drawings. Smoothing a traced image can be time consuming, but once completed yields a resolution independent graphic that will provide crisp reproduction for all future uses. We can provide this service for you at our regular file intervention rate. Minimum required DPI (dots per inch) is 300.

**BLEEDS:**

Please incorporate 0.125" of overwork for all bleed images. Any portion of the image that extends to the edge of the product is considered a bleed. Minimum required size with bleed is 2.227" x 3.477" for standard card size file.

**MARGINS:**

Elements that do not bleed should be at least 0.125" from the edge.

## Anti-Counterfeiting Descriptions

### Printing Types

- 1) **Laminated Lithographic Printing:** High resolution (>3600 dpi) offset printing technology yields photographic quality images. Laminated printing places the ink layer under a rigid clear plastic overlay which protects the printed image from abrasion and allows you to re-print over the existing artwork on the card. The cards are compatible with all Photo ID printing methods: dye-sub, reverse transfer and resin transfer.
- 2) **Surface Lithographic Printing:** This process is identical to the Laminated Lithographic Printing, but the ink layer is applied to the outer surface of the finished card and may include a clear coat. You may not be able to re-print on the card. The inks and clear coat are not compatible with D2T2 printing (Dye Diffusion Thermal Transfer, AKA dye-sublimation) but may be compatible with reverse transfer printing methods. The surface printing is durable enough for normal handling and use, but may wear more quickly in heavy use or swipe (magnetic stripe) applications. It is not recommended for high use applications, or for printing critical data such as emergency information. This process is often used for quick turnaround of simple text and graphics on card backs.

### Surface Hologram

Holograms are one of the most recognizable anti-counterfeiting devices on the market. The optically variable image cannot be duplicated with standard printing. Surface holograms are applied via hot stamping to the exterior of the card surface. This style of application is common to all financial transaction cards.

### Embedded Hologram

Embedded holograms are positioned under the rigid clear outer layer of the card surface. Unlike surface holograms, embedded holograms are amenable to dye sublimation – allowing the entire card surface to be personalized. This application style furthers the effectiveness of the anti-counterfeiting feature by requiring expensive specialized equipment during manufacture.

### Embedded Advantage™ Security Seal

The Advantage™ product is a specialized optically variable device that is manufactured in only one plant worldwide. It has been the OVD of choice for many government identity documents, including many states driver licenses and the INS card. Like the embedded hologram, this device is placed under the rigid clear outer layer and is not subject to surface abrasion and wear. Advantage™ images shift from orange to green at different viewing angles.

### Invisible Ultra-Violet (UV) Fluorescing Images

Common on credit card, currency and travel documents, invisible ink images provide a covert anti-counterfeiting mechanism. Though blue/violet fluorescing ink is readily available and inexpensive, red, green, yellow and orange fluorescing pigments remain difficult to acquire. This covert anti-counterfeiting device remains popular because of its relatively easy implementation in the field.

### Micro-fine Printing

Very small spot color printing that exploits the limitations of inkjet, toner based (laser) and dye sublimation printers. Counterfeit reproductions can be determined with a handheld magnification tool.

### Guilloche Printing

Fine line interlocking spot color patterns that are extremely difficult to scan and reproduce. These design elements are often multicolor and are commonly used on currency and travel documents.

### Composite Formulations

Composite formulations are designed for durable applications and for use in dye sublimation printers that employ re-transfer technology and/or polyester laminate patches. Composite cards will minimize the warping caused by such processes. These formulations derive their strength from combining biaxial oriented polyester (OPET) with traditional polyvinyl chloride (PVC).

### Custom Card Artwork Placement and Inkjet Location Guides

Standard PVC and Composite PVC/Polyester Cards

Company Name:		PO No.		Date	
Quantity:		Card and Artwork File No.			

**1. External Number:**

- Standard Location: The standard external # location is shown on the template below. The external # can only be printed on the back of the card. The external # will be printed in the standard location, unless otherwise specified.
- Custom Location: Please indicate the desired external # location by writing "12345" on the appropriate template. The external # can only be printed on the back of the card.

**2. An Artwork File Number** is placed on each card. The standard location is indicated by the "CCCCC". The standard location for the custom artwork number is on the back side of the card. Please indicate/incorporate the artwork number on the artwork. *If there will be front side printing only, the custom artwork number will be placed on the printed side, opposite the standard location.*

**3. Artwork Placement:** Please indicate the placement of your artwork on the template below. Custom artwork must clear the slot punch locations and edges by a min. of 0.125".

**4. Magnetic Stripe (Optional):** If the location of the magnetic stripe is custom (other than standard) and/or if other types of magnetic stripes are to be added to the card (i.e. Debitek stripe), indicate the locations of the magnetic stripe(s) on the template.

- Standard Location
- Custom Location

### Card Artwork Templates

Slot Punch Indicators

12345 = Card ID Number  
YYYYYYYY-YY = Sales Order Number

Front

Back

- Notes:
1. External # location reads in the direction as shown. External # character height is approximately 0.1".
  2. Cards will have a small "HID logo" and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card.
  3. A standard custom artwork file number is printed on the back side of the card. Front side printing of this same number is an option.
  4. Slot punch location "indicators" will appear on the back side of the card only.
  5. Do not order slot punched cards for use in dye sublimation printers.  
Slot edge may damage the printer ribbon. Slot should be punched after dye sublimation printing.
  6. Some video imaging printers cannot accommodate pre-slot punched cards. Please consult with the printer manufacturer prior to ordering.

\*Revision numbers and availability are subject to change without notice. Consult factory for availability.

<sup>1</sup> Configuration Setting Options are as follows (Factory or Field Configurable):

- 00 = Beep on, LED normally red, reader flashes green on tag read
- 01 = Beep off, LED normally red, reader flashes green on tag read
- 02 = Beep on, LED normally off, reader flashes green on tag read
- 03 = Beep off, LED normally off, reader flashes green on tag read
- 04 = Beep on, LED normally red, host must flash green
- 05 = Beep off, LED normally red, host must flash green
- 06 = Beep on, LED normally off, host must flash red and/or green
- 07 = Beep off, LED normally off, host must flash red and/or green

<sup>2</sup> iCLASS Security Options (Factory or Field Configurable): See Application Note Number 28 for additional information on Key Management.

- 0 = Standard (Reads all iCLASS cards with unique keys diversified from HID master key)
- 1 = Custom, not valid with FIPS201 options (Reads only iCLASS cards with unique keys diversified from matching site specific master key; consult factory for availability)
- C = Standard with Open Collector Tamper enabled
- D = Custom with Open Collector Tamper enabled

<sup>3</sup> MIFARE Card Serial Number (CSN) Wiegand Output Modes are as follows (Factory or Field Configurable). Refer to the "iCLASS Reader Wiegand Output Configuration Guide" for more details. (SETTING NOT APPLICABLE WITH ELITE ORDERS. ELITE READERS DO NOT READ MIFARE CSN.)

- 0 = 32 bit
- 1 = 32 bit reverse (Same as 6055A and 6055BXX0011)
- 2 = 26 bit
- 3 = 34 bit
- 4 = 40 bit
- 5 = 37 bit
- 6 = 56 bit
- Z = CSN Suppressed

<sup>4</sup> FIPS201 (USA Government Smart Card) Formats:

- 7 = 200 bit, 8 = 64 bit, BCD, 9 = 64 bit, REVERSE BCD, A = 40 bit, BCD, C = 40 bit, REVERSE BCD, D = 75 bit GSA, F = HMAC + 200 bit, G = HMAC + 40 bit BCD, H = HMAC + 64 bit BCD, I = 80 bit combined, J = 32 bit HMAC, K = 200 bit & 14443A 56 bit CSN, M = 200 bit & 14443A 26 bit CSN, N = 75 bit GSA & 14443A 56 bit CSN, T = 14443A 32bit CSN.

For more information on the FIPS201 outputs, please refer to the output selection guide: [http://www.hidcorp.com/pdfs/products/fips201\\_technote.pdf](http://www.hidcorp.com/pdfs/products/fips201_technote.pdf).

<sup>5</sup> Keypad data is output via Wiegand cable. Reader processes keystrokes. Configuration Setting options:

- 00 = Buffer one key, no parity, 4 bit message
- 01 = Buffer one key and add parity
- 02 = Single Key buffering
- 09 = Buffer one key, add compliment, 8 bit message (Dorado)
- 14 = Buffer one to five keys (Standard 26 bit output)
- 22 = Local PIN Verify. Requires User PIN code to be programmed into the iCLASS Credential at the factory or by using the iCLASS Card Programmer (please consult factory for availability).
- 10 = Buffer six keys and add parity
- 19 = Buffer four keys and add parity

<sup>6</sup> Contact Factory for pricing, availability, and minimum order quantity.

RoHS compliant Readers are appropriately marked on reader and box. (RoHS or Restriction of Hazardous Substances Directive restricts certain hazardous substances in electrical and electronic equipment.)

D = Custom with Open Collector Tamper enabled

<sup>3</sup> MIFARE Card Serial Number (CSN) Wiegand Output Modes are as follows (Factory or Field Configurable). Refer to the "iCLASS Reader Wiegand Output Configuration Guide" for more details. (SETTING NOT APPLICABLE WITH ELITE ORDERS. ELITE READERS DO NOT READ MIFARE CSN.)

0 = 32 bit    1 = 32 bit reverse (Same as 6055A and 6055BXX0011)    2 = 26 bit    3 = 34 bit    4 = 40 bit    5 = 37 bit    6 = 56 bit    Z = CSN Suppressed

<sup>4</sup> FIPS201 (USA Government Smart Card) Formats:

7 = 200 bit, 8 = 64 bit, BCD, 9 = 64 bit, REVERSE BCD, A = 40 bit, BCD, C = 40 bit, REVERSE BCD, D = 75 bit GSA, F = HMAC + 200 bit, G = HMAC + 40 bit BCD, H = HMAC + 64 bit BCD, I = 80 bit combined, J = 32 bit HMAC, K = 200 bit & 14443A 56 bit CSN, M = 200 bit & 14443A 26 bit CSN, N = 75 bit GSA & 14443A 56 bit CSN, T = 14443A 32bit CSN.

For more information on the FIPS201 outputs, please refer to the output selection guide: [http://www.hidcorp.com/pdfs/products/fips201\\_technote.pdf](http://www.hidcorp.com/pdfs/products/fips201_technote.pdf).

<sup>5</sup> Keypad data is output via Wiegand cable. Reader processes keystrokes. Configuration Setting options:

00 = Buffer one key, no parity, 4 bit message    09 = Buffer one key, add compliment, 8 bit message (Dorado)    10 = Buffer six keys and add parity  
11 = Buffer one key and add parity    14 = Buffer one to five keys (Standard 26 bit output)    19 = Buffer four keys and add parity  
20 = Single Key buffering    22 = Local PIN Verify. Requires User PIN code to be programmed into the iCLASS Credential at the factory or by using the iCLASS Card Programmer (please consult factory for availability.)

<sup>6</sup> Contact Factory for pricing, availability, and minimum order quantity.

<sup>7</sup> All the following communication modules allow host driven communication using the iCLASS Serial Protocol. All the following communication modules (except USB) allow for card ID reporting instantiated by the reader. For multi-drop functionality, see iCLASS HADP/OSDP Readers. All Reader/Writers are terminal strip readers. RoHS compliant Readers are appropriately marked on reader and box. (RoHS or Restriction of Hazardous Substances Directive restricts certain hazardous substances in electrical and electronic equipment.)

\* Transit readers have the ability to read FeliCa IDm's and CEPAS CAN or CSN.

\*\* Revision numbers are subject to change without notice. Consult factory for availability.

<sup>1</sup> Configuration Setting Options are as follows (Factory or Field Configurable):

00 = Beep on, LED normally red, reader flashes green on tag read	03 = Beep off, LED normally off, reader flashes green on tag read	06 = Beep on, LED normally off, host must flash red and/or green
01 = Beep off, LED normally red, reader flashes green on tag read	04 = Beep on, LED normally red, host must flash green	07 = Beep off, LED normally off, host must flash red and/or green
02 = Beep on, LED normally off, reader flashes green on tag read	05 = Beep off, LED normally red, host must flash green	

<sup>2</sup> iCLASS Security Options (Factory or Field Configurable): See Application Note Number 28 for additional information on Key Management.

0 = Standard (Reads all iCLASS cards with unique keys diversified from HID master key)

<sup>3</sup> MIFARE Card Serial Number (CSN,) FeliCa IDm, CEPAS CAN/CSN output modes are as follows (Factory or Field Configurable). Refer to the "iCLASS Reader Wiegand Output Configuration Guide" for more details. (SETTING NOT APPLICABLE WITH ELITE ORDERS. ELITE READERS DO NOT READ MIFARE CSN.)

5 = 64bits LSB FeliCa or 64bits MSB CEPAS CAN	6 = 64bits LSB FeliCa or 64bits MSB CEPAS CSN	7 = 64bits LSB FeliCa or 64 bits MSB CEPAS CAN or MIFARE	8 = 64bits LSB FeliCa or 64 bits MSB CEPAS CSN or MIFARE
9 = 26 bit (Even parity +24 bits LSB + Odd Parity) FeliCa or CEPAS CAN		A = 26 bit (Even parity +24 bits LSB + Odd Parity) FeliCa or CEPAS CSN	
B = 26 bit (Even parity +24 bits LSB + Odd Parity) FeliCa or CEPAS CAN or MIFARE		C = 26 bit (Even parity +24 bits + Odd Parity) FeliCa or CEPAS CSN or MIFARE	
D = 64 bit LSB FeliCa	E = 26 bit (Even parity + 24 bits LSB + Odd parity) FeliCa	F = 64 bits LSB FeliCa or 64 bits MIFARE	Z = CSN Suppressed

<sup>5</sup> Keypad data is output via Wiegand cable. Reader processes keystrokes. Configuration Setting options:

00 = Buffer one key, no parity, 4 bit message	09 = Buffer one key, add complement, 8 bit message (Dorado)	10 = Buffer six keys and add parity
11 = Buffer one key and add parity	14 = Buffer one to five keys (Standard 26 bit output)	19 = Buffer four keys and add parity
20 = Single Key buffering	22 = Local PIN Verify. Requires User PIN code to be programmed into the iCLASS Credential at the factory or by using the iCLASS Card Programmer (please consult factory for availability.)	

<sup>6</sup> Contact Factory for pricing, availability, and minimum order quantity.

RoHS compliant Readers are appropriately marked on reader and box. (RoHS or Restriction of Hazardous Substances Directive restricts certain hazardous substances in electrical and electronic equipment.)

**iCLASS/multiCLASS Rijkspas Reader Part Numbers and Options**

Card Reader Description	Base Part No	Current Rev No*	Color Options	Hardware Options	<u>Configuration</u> <sup>1</sup>
iCLASS – Rijkspas RS10 Contactless Smart Card Reader DESFire EV1 Rijkspas, MIFARE Classic (Wiegand) Mullion Mount (HADP/OSDP) Read Only, RoHS Compliant	7100 7102	C	K = Black	T = Terminal Strip, No Spacer S = Terminal Strip & Spacer	-RJP00000
iCLASS – Rijkspas RS40 Contactless Smart Card Reader: DESFire EV1 Rijkspas, MIFARE Classic (Wiegand) US, European & Asian Back Box Mount - (HADP/OSDP) Read Only, RoHS Compliant	7120 7122	C	K = Black	T= Terminal Strip, No Spacer S = Terminal Strip & Spacer	-RJP00000
iCLASS – Rijkspas RSK40 Contactless Smart Card Reader with Keypad: DESFire EV1 Rijkspas, MIFARE Classic (Wiegand) US, European & Asian Back Box Mount - (HADP/OSDP) Read Only, RoHS Compliant	7130 7132	C	K = Black	T= Terminal Strip, No Spacer S = Terminal Strip & Spacer	-RJP00000

\*Revision numbers and availability are subject to change without notice. Consult factory for availability.

<sup>1</sup> Configuration Setting Options are as follows (Factory or Field Configurable):

00 = Beep on, LED normally red, reader flashes green on tag read      03 = Beep off, LED normally off, reader flashes green on tag read      06 = Beep on, LED normally off, host must flash red and/or green  
 01 = Beep off, LED normally red, reader flashes green on tag read      04 = Beep on, LED normally red, host must flash green      07 = Beep off, LED normally off, host must flash red and/or green  
 02 = Beep on, LED normally off, reader flashes green on tag read      05 = Beep off, LED normally red, host must flash green

<sup>2</sup> iCLASS Security Options (Factory or Field Configurable): See Application Note Number 28 for additional information on Key Management.

0 = Standard (Reads all iCLASS cards with unique keys diversified from HID master key)  
 1 = Elite Key (Reads only iCLASS cards with unique keys diversified from matching site specific master key; consult factory for availability)  
 P = Standard with OSDP Tamper enabled  
 Q = Elite with OSDP Tamper enabled

<sup>3</sup> MIFARE Card Serial Number (CSN) Wiegand Output Modes are as follows (Factory or Field Configurable). Refer to the "iCLASS Reader Wiegand Output Configuration Guide" for more details.

(SETTING NOT APPLICABLE WITH ELITE ORDERS. ELITE READERS DO NOT READ MIFARE CSN.)  
 0 = 32 bit      1 = 32 bit reverse (Same as 6055A and 6055BXX0011)      2 = 26 bit      3 = 34 bit      4 = 40 bit      5 = 37 bit      6 = 56 bit      Z = CSN Suppressed

<sup>4</sup> FIPS201 (USA Government Smart Card) Formats:

7 = 200 bit, 8 = 64 bit, BCD, 9 = 64 bit, REVERSE BCD, A = 40 bit, BCD, C = 40 bit, REVERSE BCD, D = 75 bit GSA, F = HMAC + 200 bit, G = HMAC + 40 bit BCD, H = HMAC + 64 bit BCD, I = 80 bit combined, J = 32 bit HMAC, K = 200 bit & 14443A 56 bit CSN, M = 200 bit & 14443A 26 bit CSN, N = 75 bit GSA & 14443A 56 bit CSN, T = 14443A 32bit CSN.

For more information on the FIPS201 outputs, please refer to the output selection guide: [http://www.hidcorp.com/pdfs/products/fips201\\_technote.pdf](http://www.hidcorp.com/pdfs/products/fips201_technote.pdf).

<sup>5</sup> Keypad data is output via Wiegand cable. Reader processes keystrokes. Configuration Setting options:

00 = Buffer one key, no parity, 4 bit message      09 = Buffer one key, add compliment, 8 bit message (Dorado)      10 = Buffer six keys and add parity  
 11 = Buffer one key and add parity      14 = Buffer one to five keys (Standard 26 bit output)      19 = Buffer four keys and add parity  
 20 = Single Key buffering      22 = Local PIN Verify. Requires User PIN code to be programmed into the iCLASS Credential at the factory or by using the iCLASS Card Programmer (please consult factory for availability.)

<sup>6</sup> Contact Factory for pricing, availability, and minimum order quantity.

<sup>7</sup> The HADP/OSDP communication modules allow host driven communication using HADP (HID Advanced Device Protocol) / OSDP (Open Supervised Device Protocol) over an RS485 (Half-Duplex) hardware interface.

RoHS compliant Readers are appropriately marked on reader and box. (RoHS or Restriction of Hazardous Substances Directive restricts certain hazardous substances in electrical and electronic equipment.)

## 13.56 MHz How to Order Guide – D00529, D.0

### Hi-O iCLASS Readers

Card Reader Description	Base Part No	Current Rev No*	Color Options	Hardware Options <sup>7</sup>	Configuration Settings Options	iCLASS Security	MIFARE CSN	Keypad Configuration	Optional Custom
iCLASS R10 Contactless Smart Card Reader Hi-O Communications Mullion Mount Read-Only, RoHS Compliant	6102	C	G = Charcoal Gray K = Black	H = Terminal Strip with Hi-O Communications	00	0 1	0	For keypad readers only	-XXXXY
iCLASS R15 Contactless Smart Card Reader Hi-O Communications Mullion Mount Read-Only, RoHS Compliant	6142	C	G = Charcoal Gray K = Black	H = Terminal Strip with Hi-O Communications	00	0 1	0	For keypad readers only	-XXXXY
iCLASS R30 Contactless Smart Card Reader Hi-O Communications European and Asian Back Box Mount Read-Only, RoHS Compliant	6112	C	G = Charcoal Gray K = Black	H = Terminal Strip with Hi-O Communications	00	0 1	0	For keypad readers only	-XXXXY
iCLASS R40 Contactless Smart Card Reader Hi-O Communications US, European and Asian Back Box Mount Read-Only, RoHS Compliant	6122	C	G = Charcoal Gray K = Black	H = Terminal Strip with Hi-O Communications	00	0 1	0	For keypad readers only	-XXXXY
iCLASS RK40 Contactless Smart Card Keypad Reader Hi-O Communications US, European and Asian Back Box Mount Read-Only, RoHS Compliant	6132	B	G = Charcoal Gray K = Black	H = Terminal Strip with Hi-O Communications	00	0 1	0	00	-XXXXY

\*Revision numbers and availability are subject to change without notice. Consult factory for availability.

<sup>1</sup> Configuration Setting Options are as follows (Factory or Field Configurable):

00 = Beep on, LED normally red, reader flashes green on tag read

<sup>2</sup> iCLASS Security Options (Factory or Field Configurable): See Application Note Number 28 for additional information on Key Management.

0 = Standard (Reads all iCLASS cards with unique keys diversified from HID master key)

1 = Elite Key (Reads only iCLASS cards with unique keys diversified from matching site specific master key; consult factory for availability)

<sup>3</sup> MIFARE Card Serial Number (CSN) Hi-O bus output modes are as follows:

(SETTING NOT APPLICABLE WITH ELITE ORDERS. ELITE READERS DO NOT READ MIFARE CSN.)

0 = 32 bit LSB (if DESFire or other CSN Length, output is length of CSN output LSB)

<sup>5</sup> Keypad data is output via Hi-O bus. Reader processes keystrokes. Configuration Setting options:

00 = ASCII (Hi-O Bus Default)

<sup>6</sup> Contact Factory for pricing, availability, and minimum order quantity.

<sup>7</sup> The Hi-O communications allows for encrypted CANbus communication with other Hi-O enabled devices.

RoHS compliant Readers are appropriately marked on reader and box. (RoHS or Restriction of Hazardous Substances Directive restricts certain hazardous substances in electrical and electronic equipment.)

**bioCLASS Reader/Enroller, Reader-Only and Read/Write Biometric Reader Part Numbers and Options**

\*Revision numbers and availability are subject to change without notice. Consult factory for availability.

<sup>1</sup> Configuration Setting Options are as follows (Factory or Field Configurable):

- 00 = Beep on, LED normally red, reader flashes green on tag read
- 01 = Beep off, LED normally red, reader flashes green on tag read
- 02 = Beep on, LED normally off, reader flashes green on tag read
- 03 = Beep off, LED normally off, reader flashes green on tag read
- 04 = Beep on, LED normally red, host must flash green
- 05 = Beep off, LED normally red, host must flash green
- 06 = Beep on, LED normally off, host must flash red and/or green
- 07 = Beep off, LED normally off, host must flash red and/or green

<sup>2</sup> iCLASS Security options (Factory or Field Configurable)

- 0 = Standard; protects access and biometric applications (Reads/Enrolls all iCLASS cards with unique keys diversified from HID master key)
- 1 = Elite; protects access and biometric applications (Reads/Enrolls only iCLASS cards with site-specific Elite key; consult factory for availability)
- 2 = Bio-Elite Key; protects biometric application (Reads/Enrolls only iCLASS cards with site-specific Bio-Elite key; consult factory for availability)
- C = Standard with Open Collector Tamper enabled
- D = Elite with Open Collector Tamper enabled

<sup>3</sup> MIFARE Card Serial Number (CSN) Wiegand Output Modes are as follows (Factory or Field Configurable). Refer to the "iCLASS Reader Wiegand Output Configuration Guide" for more details.

(SETTING NOT APPLICABLE WITH ELITE ORDERS. ELITE READERS DO NOT READ MIFARE CSN.)

- 0 = 32 bit
- 1 = 32 bit reverse (Same as 6055A and 6055BXX0011)
- 2 = 26 bit
- 3 = 34 bit
- 4 = 40 bit
- 5 = 37 bit
- 6 = 56 bit

<sup>4</sup> Keypad data is output via Wiegand cable. Reader processes keystrokes. Configuration Setting options:

- 00 = Buffer one key, no parity, 4 bit message
- 01 = Buffer one key and add parity
- 02 = Single Key buffering
- 09 = Buffer one key, add compliment, 8 bit message (Dorado)
- 14 = Buffer one to five keys (Standard 26 bit output)
- 22 = Local PIN Verify. Requires User PIN code to be programmed into the iCLASS Credential by using Reader/Enroller or CP575A.
- 10 = Buffer six keys and add parity
- 19 = Buffer four keys and add parity

<sup>5</sup> Contact Factory for pricing, availability, and minimum order quantity.

<sup>6</sup> BIO500 fingerprint biometric module upgrade is compatible with the RWKL550 iCLASS LCD Keypad Reader only.

<sup>7</sup> In addition to RKL57 reader only (6180BKT), this part provides additional enrollment capabilities and multi-lingual support. Reader/Enroller is field configurable for one of the following behaviors: reader/enroller, reader-only or enroller-only, and field configurable for one of 10 languages (see datasheet for more information). This product replaces CP575 fingerprint template enroller (no longer available).

<sup>8</sup> All the following communication modules allow host driven communication using the iCLASS Serial Protocol. All the following communication modules (except USB) allow for card ID reporting instantiated by the reader.

RoHS compliant Readers are appropriately marked on reader and box. (RoHS or Restriction of Hazardous Substances Directive restricts certain hazardous substances in electrical and electronic equipment.)

**Reader Wiegand Output Configuration Guide**

MIFARE CSN <sup>1,2</sup> Wiegand Data Output formats	Comments	Model Number <sup>3,4</sup>
Any HID/OEM format.	As encoded into the iCLASS card by HID factory or field programmer.	All models
32-bit, MIFARE Card Serial Number.	For MIFARE Cards only, random number burned into card chip.	XXXXBXX0000YY
32-bit, MIFARE Card Serial Number, reverse output.	For MIFARE Cards only, reverse output matches HID MIFARE Reader base model number: 6055A and 6055BXX0011	XXXXBXX0001YY
26-bit, derived from MIFARE Card Serial number.	For MIFARE Cards only, ID = 16 lower bits of CSN. Reader generates fixed FC - defaults to 001, but can be factory or field configured.	XXXXBXX0002YY
34-bit, MIFARE Card Serial number plus beginning/ending parity.	For MIFARE Cards only	XXXXBXX0003YY
40-bit, MIFARE Card Serial number plus 8-bit checksum.	For MIFARE Cards only, Checksum per Philips standard.	XXXXBXX0004YY
37 bit, derived from MIFARE Ultralight or DESFire® Card Serial Number	For Ultralight or DESFire® Cards only, 37 lower bits of CSN in reverse order (Keypad Readers Only)	61XBXX0005YY
56 bit, MIFARE Ultralight or DESFire® Card Serial Number	For Ultralight or DESFire® Card Only, 56 bit CSN in reverse order (Keypad Readers Only)	61XBXX0006YY

FIPS201 (USA Government Smart Card) Wiegand Data Output formats – Low Level <sup>5</sup>	Comments	Model Number <sup>3,4</sup>
200 bit, FIPS201 output	Output as defined by USA Government Smart Card Specification	XXXXBXXXXX7YY-G3.0
64 bit, BCD First FIPS201 output	Output as defined by USA Government Smart Card Specification	XXXXBXXXXX8YY- G3.0
64 bit, REVERSE BCD First FIPS201 output	Output as defined by USA Government Smart Card Specification	XXXXBXXXXX9YY- G3.0
40 bit, BCD FIPS201 output	Output as defined by USA Government Smart Card Specification	XXXXBXXXXXAYY- G3.0
40 bit, REVERSE BCD FIPS201 output	Output as defined by USA Government Smart Card Specification	XXXXBXXXXXCYY- G3.0
HMAC + 200 bit, FIPS201 output	Output as defined by USA Government Smart Card Specification	XXXXBXXXXXFYY-G3.0
HMAC + 40 bit BCD, FIPS201 output	Output as defined by USA Government Smart Card Specification	XXXXBXXXXXGY- G3.0
HMAC + 64 bit BCD, FIPS201 output	Output as defined by USA Government Smart Card Specification	XXXXBXXXXXHY- G3.0
80 bit combined, FIPS201 output	Output as defined by USA Government Smart Card Specification	XXXXBXXXXXIYY-G3.0
32 bit HMAC, FIPS201 output	Output as defined by USA Government Smart Card Specification	XXXXBXXXXXJYY- G3.0

Notes:

1. MIFARE CSN = Card Serial Number, a 32-bit random number burned into the chip by the chip manufacturer (not HID).
2. iCLASS 64 bit CSN is never transmitted via the Wiegand Output. See HID Application Note Number 28 for details.
3. XX = Indicates model variations, color and hardware options. Refer to the iCLASS "How to Order Guide" for complete ordering instructions.
4. YY = Indicates Keypad Configuration Setting Options for iCLASS Keypad Readers Only.
5. Must use the "-G2.0" suffix when ordering a FIPS201 Wiegand Data Output Format, (128 bit output is configurable with a Command Card)

All trademarks and registered trademarks are the properties of their respective companies.

## 13.56 MHz How to Order Guide, – D00529, D.0

### Programmer Ordering Guide

3150BNN00 (Model: CP400 w/Standard Security)

**Description:** Programmer for HID 13.56 MHz iCLASS Programmable RFID Standard Security<sup>5</sup> Transponders/Cards/Keys/Tags, with CD-ROM and diskette containing programmer software and plug-in power supply.

3150BNH00 (Model: CP400 w/High Security)

**Description:** Programmer for HID 13.56 MHz iCLASS Programmable RFID High Security<sup>5</sup> Transponders/Cards/Keys/Tags, with CD-ROM and diskette containing programmer software and plug-in power supply.

6250BNN00 (Model: CP575A)

**Description:** The CP575A programmer includes CP400 features with the added capability of programming biometric templates for use in our bioCLASS reader (RWKLB575) and includes a bioCLASS reader/writer, personalization diskette, universal power supply and USB cable.

#### Section 1: To upgrade<sup>4</sup> an existing iCLASS Programmer please provide:

HID Part Number: 3150-302-0x

Serial Number: \_\_\_\_\_

Software Name: \_\_\_\_\_

(Software name can be found on the Customer Specific Files diskette)

#### Section 2: Please specify the following<sup>1,2</sup>:

A - Format Number # 1 \_\_\_\_\_

Facility Code Range, or specific Facility Code \_\_\_\_\_

Card Number Range (Start and Stop) \_\_\_\_\_

B - Format Number # 2 (If required) \_\_\_\_\_

Facility Code Range, or specific Facility Code \_\_\_\_\_

Card Number Range (Start and Stop) \_\_\_\_\_

#### Section 3: Customer must also identify the final user of the iCLASS Programmer to HID<sup>3</sup>:

Company Name: \_\_\_\_\_

Contact Name: \_\_\_\_\_

Address: \_\_\_\_\_

\_\_\_\_\_

Phone #: \_\_\_\_\_

Fax #: \_\_\_\_\_

E-mail Address: \_\_\_\_\_

Entity Type: \_\_\_\_\_

Incorporation Place: \_\_\_\_\_

Signatory Authorization: \_\_\_\_\_

Signatory Title: \_\_\_\_\_

<sup>1</sup> Only formats authorized for use by your company can be ordered. For HID Format Numbers, please contact HID Customer Service. Consult factory for a list of programmable RFID Transponders/Cards/Tags that can be programmed with this Programmer.

<sup>2</sup> For Corporate 1000 Format, iCLASS Elite Format, and Custom Facility Code & Card Number Range Programmers, please contact Customer Service for availability, lead times, and pricing.

<sup>3</sup> To ensure security of the format and cards, a Software License Agreement must be signed by the final user of the iCLASS Programmers and iCLASS SDK, and be on file at HID prior to shipment.

<sup>4</sup> Software License Agreement does not apply to iCLASS Programmer upgrades.

<sup>5</sup> Find the difference between Standard and High Security iCLASS Cards and Readers, see [CP400 Security FAQ](#).

## SmartID Readers

### SmartID Single-Technology 13.56 MHz Readers Part Numbers and Options

Card Reader Description	Base Part No.	Current Rev. No.	Color Options	Application <sup>1</sup>
<b>SmartID S10</b> Contactless Smart Card Reader <b>Mullion Mount</b> , Terminal Strip Wiegand, Clock-and-Data, RS232, RS485 or RS422 (RoHS Compliant)	8030	D	S = Silver	HM = HID MIFARE (default) HC = HID MIFARE (non-default) CM = MIFARE DM = Dual MIFARE DF = DESFire
<b>SmartID SW100</b> Contactless Smart Card Reader/Writer <b>Mullion Mount</b> , Terminal Strip Host driven RS232, RS485 or RS422 (RoHS Compliant)	8030	D	S = Silver	TC = T/CL Protocol RW = 3964 Protocol (Legacy)
<b>SmartID SK10</b> Contactless Smart Card Keypad Reader <b>Mullion Mount</b> , Terminal Strip Wiegand, Clock-and-Data, RS232, RS485 or RS422 (RoHS Compliant)	8031	D	S = Silver	HM = HID MIFARE (default) HC = HID MIFARE (non-default) CM = MIFARE DM = Dual MIFARE DF = DESFire
<b>SmartID SWK100</b> Contactless Smart Card Keypad Reader/Writer <b>Mullion Mount</b> , Terminal Strip Host driven RS232, RS485 or RS422 (RoHS Compliant)	8031	D	S = Silver	TC = T/CL Protocol RW = 3964 Protocol (Legacy)

<sup>1</sup> All part numbers generated by the above grid (except HM = HID MIFARE) require an additional accompanying "format configuration". The format configuration is a separate part number that is combined on a PO with the above part number to make up the full definition of a reader. Format configurations are either generic (for public use) or custom. For generic format information, see [SmartID – Generic Configuration Document \(http://www.hidcorp.com/documents/smartid\\_configuration\\_guide\\_en.pdf\)](http://www.hidcorp.com/documents/smartid_configuration_guide_en.pdf). For custom format definition, see Custom SmartID Format, MIFARE or DESFire Requirements on subsequent page. For more information on applications and format configurations, reference the whitepaper SmartID Application and Configurations ([http://www.hidcorp.com/documents/smartid\\_apps\\_configs.pdf](http://www.hidcorp.com/documents/smartid_apps_configs.pdf)). The HM application provides standard reader configurations, including beeper and LEDs. The HC application allows for configuration of beeper and LEDs.

### SmartTRANS Multi-Technology Readers Part Numbers and Options (13.56 MHz & 125 kHz)

Card Reader Description	Base Part No.	Current Rev. No.	Color Options	Application <sup>1</sup>
<b>SmartID SP10</b> Multi-Technology Contactless Smart Card and Prox Reader HID Prox and AWID (125 kHz) or Indala Prox <b>Mullion Mount</b> , Terminal Strip Wiegand, Clock-and-Data, RS232, RS485 or RS422 (RoHS Compliant)	8100 = HID 8140 = Indala	D	S = Silver	HM = HID MIFARE (default) HC = HID MIFARE (non-default) CM = MIFARE DF = DESFire
<b>SmartID SPK10</b> Multi-Technology Contactless Smart Card and Prox Keypad Reader HID Prox and AWID (125 kHz) or Indala Prox <b>Mullion Mount</b> , Terminal Strip Wiegand, Clock-and-Data, RS232, RS485 or RS422 (RoHS Compliant)	8101 = HID 8141 = Indala	D	S = Silver	HM = HID MIFARE (default) HC = HID MIFARE (non-default) CM = MIFARE DF = DESFire

<sup>1</sup> All part numbers generated by the above grid (except HM = HID MIFARE) require an additional accompanying "format configuration". The format configuration is a separate part number that is combined on a PO with the above part number to make up the full definition of a reader. Format configurations are either generic (for public use) or custom. For generic format information, see [SmartID – Generic Configuration Document \(http://www.hidcorp.com/documents/smartid\\_configuration\\_guide\\_en.pdf\)](http://www.hidcorp.com/documents/smartid_configuration_guide_en.pdf). For custom format definition, see Custom SmartID Format, MIFARE or DESFire Requirements on subsequent page. For more information on applications and format configurations, reference the whitepaper SmartID Application and Configurations ([http://www.hidcorp.com/documents/smartid\\_apps\\_configs\\_wp\\_en.pdf](http://www.hidcorp.com/documents/smartid_apps_configs_wp_en.pdf)). The HM application provides standard reader configurations, including beeper and LEDs. The HC application allows for configuration of beeper and LEDs.

### SmartTOUCH Biometric Readers Part Numbers and Options

Card Reader Description	Part No. Prefix	Base Part No.	Application <sup>1</sup>
<b>SmartID SB10</b> Indoor Contactless Smart Card Reader with Biometrics Fingerprint reader matches templates stored on 13.56 MHz credentials <b>Mullion Mount</b> , Terminal Strip Wiegand, Clock-and-Data, RS232, RS485 or RS422 (RoHS Compliant)	800-	805	0 = MIFARE 2 = DESFire
<b>SmartID SBK10</b> Indoor Contactless Smart Card Keypad Reader with Biometrics Fingerprint reader matches templates stored on 13.56 MHz credentials <b>Mullion Mount</b> , Terminal Strip Wiegand, Clock-and-Data, RS232, RS485 or RS422 (RoHS Compliant)	800-	805	5 = MIFARE 7 = DESFire

<sup>1</sup> All part numbers generated by the above grid require an additional accompanying "format configuration". The format configuration is a separate part number that is combined on a PO with the above part number to make up the full definition of a reader. Format configurations are either generic (for public use) or custom. For generic format information, see [SmartID – Generic Configuration Document \(http://www.hidcorp.com/documents/smartid\\_configuration\\_guide\\_en.pdf\)](http://www.hidcorp.com/documents/smartid_configuration_guide_en.pdf). For custom format definition, see Custom SmartID Format, MIFARE or DESFire Requirements on subsequent page. For more information on applications and format configurations, reference the whitepaper SmartID Application and Configurations ([http://www.hidcorp.com/documents/smartid\\_apps\\_configs.pdf](http://www.hidcorp.com/documents/smartid_apps_configs.pdf)).

### SmartTOOLS Card Programming Software and Devices Part Numbers and Options

Card Reader Description	Part No. Prefix	Base Part No.
SmartID CP100 ProxBurn MIFARE Card and Tag Programmer Software and RS232 Desktop Card Programmer (RoHS Compliant)	501-	7753 <sup>1</sup>
SmartID CP101 ReaderTOOLS Configuration Card Programmer Software and USB Desktop Card Programmer (RoHS Compliant)	501-	7756 <sup>2</sup>

### SmartID Desktop Reader/Writer Part Numbers and Options

#### Contactless Smart Card Reader/Writer, Desktop, USB and RS232

- 800-1063\* SmartID SWD100 Reader/Writer, MIFARE & ISO14443-4 DESFire & SmartxMX, USB with PC/SC Protocol
- 800-8240\* SmartID SWD100 Reader/Writer, MIFARE & ISO14443-4 DESFire & SmartxMX, RS232 with T=CL Protocol

To complete the part number, specify formatting information.

For generic format information, see [SmartID – Generic Configuration Document \(http://www.hidcorp.com/documents/smartid\\_configuration\\_guide\\_en.pdf\)](http://www.hidcorp.com/documents/smartid_configuration_guide_en.pdf).  
([http://www.hidcorp.com/documents/smartid\\_configuration.pdf](http://www.hidcorp.com/documents/smartid_configuration.pdf))

For custom format definition, see Custom Format MIFARE® or DESFire® Reader Ordering Guide.

## 13.56 MHz How to Order Guide, – D00529, D.0

### SmartID Reader Cross Reference GEN 1 & 2

Generation 1		Generation 2	
Part Number	Description	Part Number <sup>1</sup>	Description
800-8030 800-8060	ISO 14443-3 MIFARE Sector ISO 14443-4 DESFire reader with MIFARE configuration	8030DSCM	SmartID S10 Read Only, Custom MIFARE

800-8100	SmartTRANS reader (ISO 14443 & HID Prox), PIVII	N/A	Not Available. See iCLASS FIPS 201 Readers
800-8110	SmartTRANS PINpad reader (ISO 14443 & HID Prox), PIVII	N/A	Not Available. See iCLASS FIPS 201 Readers

<sup>1</sup> All format configurations previously ordered with GEN 1 parts are backward compatible with GEN 2. When ordering GEN 2 product, order using the same format configuration number previously used when ordering GEN 1 product.

## 13.56 MHz How to Order Guide, – D00529, D.0

### GEN 2 & FlexSmart

FlexSmart		SmartID Gen 2	
Part Number <sup>1</sup>	Description	Part Number <sup>2</sup>	Description
6075AKN0000	FlexSmart HID MIFARE	8030DSHM	SmartID S10 Mullion Read Only, HID MIFARE*
6075AKNxxxx	FlexSmart HID MIFARE, non default configuration	8030DSHC	SmartID S10 Mullion Read Only, HID MIFARE*
6071AKN000000	FlexSmart HID MIFARE, Keypad	8031DSHM	SmartID SK10 Mullion Read Only Keypad, HID MIFARE*
6071AKNxxxxxx	FlexSmart HID MIFARE, Keypad, non default configuration	8031DSHC	SmartID SK10 Mullion Read Only Keypad, HID MIFARE*
6076AKNxxxx	FlexSmart Custom MIFARE	8030DSCM	SmartID S10 Mullion Read Only, Custom MIFARE*
6072AKNxxxxxx	FlexSmart Custom MIFARE, Keypad	8031DSCM	SmartID SK10 Mullion Read Only Keypad, Custom MIFARE*
6077AKNxxxx	FlexSmart Custom DESFIRE	8030DSDF	SmartID S10 Mullion Read Only, Custom DESFire*
6073AKNxxxxxx	FlexSmart Custom DESFIRE, Keypad	8031DSDF	SmartID SK10 Mullion Read Only Keypad, Custom DESFire*
N/A	* For wallswitch requirements, this part must be ordered with every reader	8090AS	SmartID Single Gang Electrical Box Cover

<sup>1</sup> xxxx signifies non-0000 configuration

<sup>2</sup> When ordering GEN 2 SmartID product with FlexSmart custom configurations, modify the format reference number (FMxxxx) previously used when ordering FlexSmart product as follows: (a) add 02 to FMxxxx and (b) separate FM and first x with a -. Thus the FlexSmart format configuration FMxxxx turns to 02FM-xxxx when ordering SmartID GEN 2 product.

### SmartID (GEN 2) & HID MIFARE

HID MIFARE		SmartID GEN2	
Part Number	Description	Part Number	Description
6055Byy0000	HID MIFARE 6055 (used for read only)	8030DSHM	SmartID S10 Read Only, HID MIFARE
6055Byyxxxx	HID MIFARE 6055 (used for read only)	8030DSHC	SmartID S10 Read Only, HID MIFARE (non-default)
6055Byy0000	HID MIFARE 6055 (used for read/write)	8030DSTC	SmartID SW100 Read/Write, T=CL Protocol
6055Byy0000	HID MIFARE 6055 (used for read-only and read/write)	N/A	Not Available
6074Ayy00	HID MIFARE 6074 (Legacy)	8030DSHM	SmartID S10 Read Only, HID MIFARE
6074Ayyxx	HID MIFARE 6074 (Legacy)	8030DSHC	SmartID S10 Read Only, HID MIFARE

<sup>1</sup> xxxx signifies non-0000 configuration

## SmartID<sup>®</sup> MIFARE<sup>®</sup> and DESFire<sup>®</sup> Reader Custom Format Request Form

**Reader Part Numbers:**

- |   |   |
|---|---|
| <input type="checkbox"/> 8030/8100 MIFARE <sup>®</sup> or DUAL MIFARE | <input type="checkbox"/> 8030/8100 DESFire <sup>®</sup> |
| <input type="checkbox"/> 8031/8101 MIFARE or DUAL MIFARE with Keypad  | <input type="checkbox"/> 8031/8101 DESFire with Keypad  |

**Description:** These custom MIFARE or DESFire readers offer a complete selection of keys and card formats for adding to existing installations or facilitating companies to manage their own keys and formats. This worksheet will help you to gather information that will be required to process orders for these readers.

**Please specify the following**

**A - Custom Format Number:** \_\_\_\_\_

**B - New Custom MIFARE Format:**

Use MAD (Yes/No):  Yes  No

If Yes, AID (recommended): \_\_\_\_\_

If No, Sector: \_\_\_\_\_

Block where data is located: \_\_\_\_\_

Starting bit: \_\_\_\_\_

Number of bits to output: \_\_\_\_\_

Block where data is located (2nd, DUAL Only) \_\_\_\_\_

Starting bit (2nd, DUAL Only) \_\_\_\_\_

Number of bits to output (2nd, DUAL Only) \_\_\_\_\_

Custom Keys (Yes/No):  Yes  No

**C - New Custom DESFire Format:**

Specify APPLICATION to store data: \_\_\_\_\_

File to store data: \_\_\_\_\_

Address in file where data is located: \_\_\_\_\_

Starting bit: \_\_\_\_\_

Number of bits to output: \_\_\_\_\_

Custom Keys (Yes/No) :  Yes  No

- Security Level:
- Plain communication
  - Plain communication secured by DES/3DES MACing
  - Fully DES/3DES enciphered communication
  - Communication mode of the file is used

\*Revision numbers and availability are subject to change without notice. Consult factory for availability. All trademarks and registered trademarks are the properties of their respective companies.

<sup>1</sup> Please refer to the "13.56 MHz Accessories" page in this guide for additional bezel options.

<sup>2</sup> 6055, 6075, 6076 and 6077 Model Configuration Setting Options are as follows (factory programmed):

00 = Beep on, LED normally red, reader flashes green on tag read

01 = Beep off, LED normally red, reader flashes green on tag read

02 = Beep on, LED normally off, reader flashes green on tag read

03 = Beep off, LED normally off, reader flashes green on tag read

04 = Beep on, LED normally red, host must flash green

05 = Beep off, LED normally red, host must flash green

06 = Beep on, LED normally off, host must flash red and/or green

07 = Beep off, LED normally off, host must flash red and/or green

<sup>3</sup> Card Read Modes are as follows (factory programmed): Refer to the "HID FlexSmart® Reader Wiegand Output Configuration" Guide for more details.

0 = HID Data only (Sector 1, MIFARE Application Directory or Sector Location, only applies if "CSN Wiegand output Mode" = 0)

1 = Card Serial Number (CSN) Only

2 = HID MIFARE Data or CSN

3 = DESFire® Custom

4 = MIFARE Custom

<sup>4</sup> Card Serial Number (CSN) Wiegand Output Modes are as follows (factory programmed). Refer to the "HID MIFARE Reader Wiegand Output Configuration" Guide for more details.

0 = 32 bit

1 = 32 bit reverse (as in 6055A)

2 = 26 bit

3 = 34 bit

4 = 40 bit

"Card Serial Number (CSN) Wiegand Output Modes" options 1, 2, 3, and 4 cannot be used if "Card Read Mode" = 0

<sup>5</sup> Custom Key: 0 = Standard keys, 1 = Custom keys

<sup>6</sup> Keypad: 0 = Buffer one key, no parity, 4 bit message

9 = Buffer one key, add compliment, 8 bit message (Dorado)

<sup>7</sup> Consult Factory.

### 13.56 MHz How to Order Guide, – D00529, D.0

#### MIFARE® Reader Wiegand Output Configuration

Base Model Number: 6055B only

Desired Wiegand Data Output format	Comments	Model Number
Any HID/OEM format.	As encoded into MIFARE card by HID factory or field programmer.	6055BXX0000
32-bit, MIFARE Card Serial Number.	Random number burned into card chip.	6055BXX0010
32-bit, MIFARE Card Serial Number, reverse output.	Reverse output matches HID MIFARE Reader base model number: 6055A.	6055BXX0011
26-bit, derived from MIFARE Card Serial number.	ID = 16 lower bits of CSN. Reader generates fixed FC - defaults to 001, but can be custom configured.	6055BXX0012
34-bit, MIFARE Card Serial number plus beginning/ending parity.		6055BXX0013
40-bit, MIFARE Card Serial Number plus 8-bit checksum.	Checksum per Philips standard.	6055BXX0014
HID/OEM format or 32-bit (MIFARE Card Serial Number).	Reader searches for HID/OEM data in sector 1, then MAD; if no HID data found, then send CSN as configured.	6055BXX0020
HID/OEM format or (32-bit MIFARE Card Serial Number in reverse output).	Reader searches for HID/OEM data in sector 1, then MAD; if no HID data found, then send CSN as configured.	6055BXX0021
HID/OEM format or 26-bit (derived from MIFARE Card Serial Number).	Reader searches for HID/OEM data in sector 1, then MAD; if no HID data found, then send CSN as configured.	6055BXX0022
HID/OEM format or 34-bit (MIFARE CSN plus beginning/ending parity).	Reader searches for HID/OEM data in sector 1, then MAD; if no HID data found, then send CSN as configured.	6055BXX0023
HID/OEM format or 40-bit (MIFARE Card Serial number plus 8 bit checksum).	Reader searches for HID/OEM data in sector 1, then MAD; if no HID data found, then send CSN as configured.	6055BXX0024

Notes:

1. MAD = MIFARE Application Directory, a table of contents for the MIFARE card located in Sector 0.
2. CSN = Card Serial Number, a 32-bit random number burned into the chip by the chip manufacturer (not HID).
3. XX = Indicates color and hardware options. Refer to the "How to Order Guide" for complete ordering instructions.

### Custom Format MIFARE® or DESFire® Reader Ordering Guide

Reader Part Numbers:

- 6076 (MIFARE®)
- 6072 (MIFARE® With Keypad)
- 6077 (DESFire®)
- 6073 (DESFire® With Keypad)

**Description:** These custom MIFARE or DESFire® readers offer a complete selection of keys and formats for adding to existing installations or facilitating companies to manage their own keys and formats. This worksheet will help you to gather information that will be required to process orders for these readers.

#### Please specify the following

A - Custom Format Number \_\_\_\_\_.

B - New Custom MIFARE Format

Specify Sector \_\_\_\_\_.

Block where data is located \_\_\_\_\_.

Starting bit \_\_\_\_\_.

Number of bits to output \_\_\_\_\_.

Custom Keys (Yes/No) \_\_\_\_\_.

C - New Custom DESFire® Format

Specify APPLICATION to store data \_\_\_\_\_.

File to store data \_\_\_\_\_.

Number of bits to output \_\_\_\_\_.

Custom Keys (Yes/No) \_\_\_\_\_.

All keys should be transferred securely and not placed in this Order Guide. All custom formats require additional time to develop and test, with a customer sign-off before the first order can be fulfilled.

Once your key is encrypted using the HID Key Wrapper program, please fill-in the following information:

Wrapped Key: \_\_\_\_\_.

Wrapping password (Pass Phrase): \_\_\_\_\_.

Using the HID Key Wrapper program will keep your key secure during order processing.

### MIFARE® Programmer/Developer Kit Ordering Guide

#### Standard Part Number

- 3011AKN00: Programmer for 13.56 MHz MIFARE standard (S50) Transponders/Cards/Tags<sup>1</sup>, with CD-ROM containing Windows 95/98/2000NT compatible software, plug-in power supply, and configuration diskette.
- 3012AKN00: HID MIFARE® Developer's Resource Kit (Reader Kit with CD)
- 3012ANS00: HID MIFARE® Developer's Resource CD Only

To upgrade<sup>4</sup> an existing HID MIFARE Programmer please provide:

Serial Number: \_\_\_\_\_.

Software Name: \_\_\_\_\_.  
(Software name can be found on the Customer Specific Files Diskette)

Please specify the following<sup>1,2</sup>:

A - Format Number # 1 \_\_\_\_\_.

Facility Code Range, or specific Facility Code \_\_\_\_\_.

Card Number Range (Start and Stop) \_\_\_\_\_.

B - Format Number # 2 (If required) \_\_\_\_\_.

Facility Code Range, or specific Facility Code \_\_\_\_\_.

Card Number Range (Start and Stop) \_\_\_\_\_.

Customer must identify the final user of the HID MIFARE Programmer to HID<sup>3</sup>:

Company Name: \_\_\_\_\_.

Contact Name: \_\_\_\_\_.

Address: \_\_\_\_\_.

Phone #: \_\_\_\_\_.

Fax #: \_\_\_\_\_.

E-mail Address: \_\_\_\_\_.

Entity Type: \_\_\_\_\_.

Incorporation Place: \_\_\_\_\_.

Signatory Authorization: \_\_\_\_\_.

Signatory Title: \_\_\_\_\_.

<sup>1</sup> Only formats authorized for use by your company can be ordered. For HID Format Numbers, please contact HID Customer Service. Consult factory for a list of programmable RFID Transponders/Cards/Tags that can be programmed with this Programmer.

<sup>2</sup> For Corporate 1000 Format and Custom Facility Code & Card Number Range Programmers, please contact Customer Service for availability, lead times, and pricing.

<sup>3</sup> HID requires that a Software License Agreement, signed by the final user of the HID MIFARE Programmer, be on file at HID prior to shipment.

<sup>4</sup> Software License Agreement does not apply to HID MIFARE Programmer upgrades.

All trademarks and registered trademarks are the properties of their respective companies.

### Corporate 1000™ Format Request & Authorization Form

Corporate 1000 is a 35-bit card format that is developed specifically for use by individual end-user organizations. Organizations must qualify, formally enroll and be accepted by HID Global Corporation.

The Corporate 1000 Format is offered to large, multi-location, and end-user organizations which use HID access control readers and cards. In this program, the end-user has the flexibility to choose any access control hardware/software platform and any HID System Provider. As the end-user utilizing the Corporate 1000 Program, fill in your company information in TABLE I. Ensure all fields are complete for the primary and secondary (if desired) authorized contacts within your company.

TABLE I: Your Company's Primary and Secondary Contacts

Information	Primary Company Contact	Secondary Company Contact
Company Name

Card numbers available within the Corporate 1000 format are 0 – 1,048,575.

Indicate the card number in which your first order should start: Enter start number here.

All card numbers following this number will be "blocked" from use. If you do not specify a card start number, your first order will start at one (1). Should you require assistance, contact your systems provider or HID directly.

Added card security:

- Invisible Ink   
 Advantage® OVD   
 Hologram   
 Micro-fine Printing   
 Signature Panel

Once accepted into the Corporate 1000 Program, HID shall grant a royalty free license to use the Corporate 1000 Format within your organization. Please sign below to enroll in this program and to confirm your acceptance of the License Agreement.
